DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 29-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 8 and 4,6,7,9 and 10, respectively, of U.S. Patent No. 6,837,070. Although the conflicting claims are not identical, they are not patentably distinct from each other because the current claims claim limitations that have been previously claimed. Claim 29 is merely patented claim 8 with the turboexpander limitation of patented claim 4 added thereto. It would have been obvious to one of ordinary skill in the art that the previously claimed invention of claim 8, could have been combined with the turboexpander of claim 4 to improve the cooling of the feedstock. The dependent claims merely add limitations from patented dependent claims. Double patenting is proper in this case, although it is filed as a divisional, since no restriction was ever made in the parent case since there is no perception of independent inventions.
